

## **CHAPTER 70 EQUIPMENT**

### **Fire Cache and Equipment**

Dillon Dispatch Center maintains minimal cache items. All other necessary fire equipment, i.e. PPE and other supplies will be ordered through DDC from the Missoula fire cache.

### **Radio Frequencies**

DDC will monitor radio traffic, and there may be times during heavy fire activity or emergency situations when dispatch will have to prioritize radio transmissions or request that a unit switches to a different frequency.

All radio transmissions will be concise and use clear text.

DDC will monitor the state/county mutual aid frequencies assigned to them. These frequencies will be assigned only for fire suppression and emergency activities and are subject to FCC laws and regulations.

See Appendix A for the Communications Plan.
